Final Pilot Study Work Plan and SAP - Final Addendum 01

Biological Selenium Removal Treatment Technology Fluidized Bed Bioreactor

Request to Add Laboratory

Mr. Burbank,

As we discussed on the phone yesterday, IAS Envirochem (IAS) has added selenium speciation (Se-IV; Se-VI) to its analytical capabilities since the Final Pilot Study Work Plan and SAP Biological Selenium Removal Treatment Technology Fluidized Bed Bioreactor Addendum 01 was written in July 2015. Review of data and quantitation reports from both IAS and Brooks Rand Laboratories, LLC (BRL) indicate the two labs produce comparable analytical results. Simplot requests Addendum 01 Section 6.2.2 be revised to include either BRL or IAS to provide selenium speciation analyses.

In reviewing Section 6.2.2 of Addendum 01, we discovered a vestige of a previous draft version wherein the text states that samples would be collected and analyzed "during weeks 4, 8, and 12" and analyzed for selenium speciation. We would also request the section be revised so that speciation analyses be performed "periodically as needed and at least once every four weeks during the 12-week performance test period." Selenium speciation analysis aids in evaluating the biological function of the fluidized bed reactor and may be performed at intervals other than weeks 4, 8, and 12.

Upon your approval, a change page (or pages) will be issued to the recipient list of the SAP to include the following revised text in the first paragraph of Section 6.2.2:

"In addition to these analyses for the weekly samples, samples collected periodically as needed and at least once every four weeks during the 12-week performance test period and will be analyzed for selenium speciation by Brooks Rand Labs LLC or IAS Envirochem."

Along with the anticipated hardcopy submittal on approval, an electronic version of the replacement page(s) will be made available for download on the project website.

Please contact me if you have any questions.

Sincerely,

Monty Johnson

Environmental Engineering Manager

cc: Submitted to the following in electronic (pdf) format via email, with the exception of paper copy to USFS, Soda Springs only. Paper copies available upon request.
